

ENERGY & CHEMICALS INDUSTRY TRANSFORMATION MAP

The energy & chemicals industry is a powerful mix of refining, olefins production and chemicals manufacturing, business and innovation capabilities.

VISION

To be a globally competitive energy and chemicals hub.

PILLARS OF TRANSFORMATION

JOBS & SKILLS

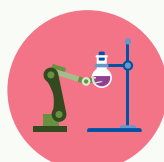

Deliver government programmes and initiatives to map out and enable career advancements

PRODUCTIVITY

Anchor high value-added Advanced Manufacturing activities

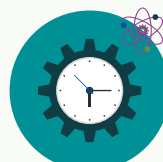

Adopt automation and digital technologies

INNOVATION

Diversify and upgrade product slate towards high value-added petrochemicals and specialty chemicals

Develop capabilities to accelerate and shorten innovation cycles

INTERNATIONALISATION

Work more closely with trade associations and chambers to level up the industry and seize new growth opportunities locally and internationally

EQUIP YOURSELF FOR THE FUTURE...

Upskill and train the workforce:

[Skills Framework for Energy and Chemicals](#)
