

ELECTRONICS INDUSTRY TRANSFORMATION MAP

**FUTURE
ECONOMY**

Singapore's electronics industry is a world-class, innovation-driven hub that provides technology, manufacturing, and business solutions to enable the development of electronic and precision products.

VISION

To build the electronics industry of tomorrow here in Singapore.

PILLARS OF TRANSFORMATION

JOBS & SKILLS

Develop Skills Framework for continuous learning to nurture a nimble and dynamic workforce

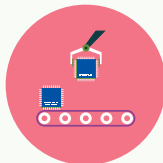

Equip Singaporeans with necessary skills to capture new opportunities

PRODUCTIVITY

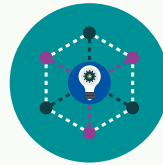

Attract and anchor high value-added manufacturing activities

Adopt robotics and automation

INNOVATION

Strengthen the innovation ecosystem to harness new growth opportunities

Diversify into new growth markets such as urban mobility and healthcare

Position Singapore as an innovation hub for new products and solutions

INTERNATIONALISATION

Partner trade associations and chambers to further strengthen Singapore's position in the global supply chain of high-value electronic components

EQUIP YOURSELF FOR THE FUTURE...

Upskill and train the workforce:

[Skills Framework for Electronics](#)
[Electronics Study Awards](#)

Enhance productivity with technology:

[EDB Productivity Grant](#)
[Productivity Solutions Grant](#)

Boost capabilities through innovation:

[Areas for Innovation](#)

Go global:
