

LAND TRANSPORT INDUSTRY TRANSFORMATION MAP

**FUTURE
ECONOMY**

An efficient and reliable land transport network is an important enabler for Singapore’s economy. The land transport industry needs to ensure it stays relevant in supporting Singapore’s future growth and meeting commuters’ needs.

VISION

An innovative land transport industry enabled by technology and a highly competent workforce.

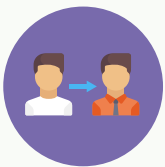

PILLARS OF TRANSFORMATION

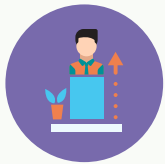

JOBS & SKILLS

Develop industry skills framework to guide capability development

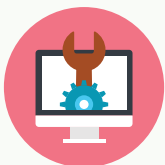

Provide training schemes such as Professional Conversion Programmes for transition into public transport careers

Upskill and reskill workforce through centralised academies

PRODUCTIVITY

Use technology to enhance maintenance

Harness data analytics to improve operations

Support innovation and collaborative projects through Transport Innovation Fund

INNOVATION

Develop autonomous vehicle technology for safer and more efficient mobility concepts

Enable demand-responsive services for smarter solutions

Embrace digitalisation to enhance services

EQUIP YOURSELF FOR THE FUTURE...

Upskill and train the workforce:

[Skills Framework for Public Transport](#)
[Land Transport Study Awards](#)

Enhance productivity with technology:

[EDB Productivity Grant](#)

Boost capabilities through innovation:

[Areas for Innovation](#)

Go global:

[Opportunities to Tap On](#)
