

# FOOD MANUFACTURING INDUSTRY TRANSFORMATION MAP

More than half of the output of Singapore's food manufacturing sector is exported to other countries. To continue to thrive in today's world of myriad options, food manufacturers need to differentiate themselves from the competition.

## VISION

To develop Singapore into the leading food and nutrition hub in Asia with globally competitive food companies.

## PILLARS OF TRANSFORMATION

### JOBS & SKILLS

Upskill the workforce through a skills framework based on current and emerging skills

Create quality jobs in food product development, processing, and quality and safety to support growth

### PRODUCTIVITY

Scale business operations through automation

Redesign existing workflow and processes

### INNOVATION

Connect research institutes with industry for co-innovation

Set up shared R&D and processing facilities

Accelerate development and commercialisation of new products

### INTERNATIONALISATION

Develop food products based on international consumer trends and standards

Adopt alternative entry modes such as B2B sales channels and establishing in-market presence

Foster partnerships with large global companies for joint-distribution or development
